5 March 2018

1 Working With Tables

This is an Introduction Section Level 1 And now I want to refer to the Table in my Text. All I need to do is say as shown in Table 1 below:

This is the Table without the Table Floating Environment

Entity	Description
A	This is A
B	This is B

This is the Table with the Table Floating Environment

Table 1: This is The First Table

Entity	Description
A	This is A
B	This is B

A Table which Spans multiple rows and columns is shown below

Table 2: This is The Second Table

	Grades		Description
	English	Maths	
Section A	A	A+	Very Good Grades
	B	B	Satisfactory
	C	B	Needs Improvement

2 How To Include Graphics In The Document

This section of the tutorial looks at how to include graphics in your paper. For example see Figure 1 Below for the Home Page of the System.

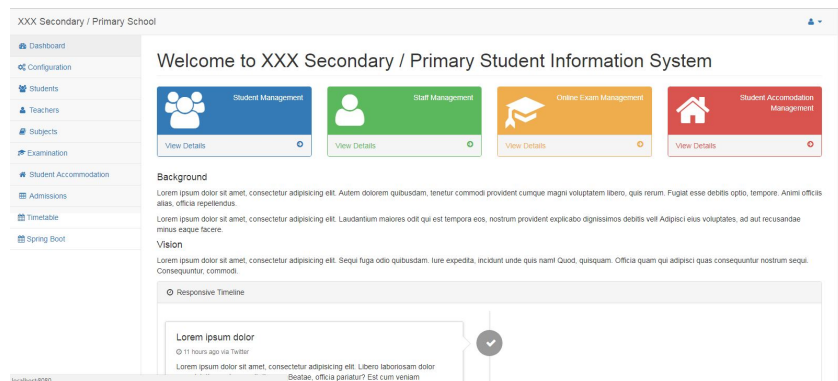

Figure 1: This is the Home Page for SIS

2.1 Locating an Image in A Lower Directory

This Section illustrates how to reference other images that are not in the root directory of the LaTeX document you are working on. To do that see Figure 2 Below: This is the total number of views for the Blood Sweat and Tears Music Video on YouTube.

Figure 2: BST View Count

2.2 Locating Images in A Higher Directory Level

The two examples shown so far are used to locate images in the current working directory as well as the lower level directory meaning a directory with a sub directory. Here the example shows how to include images from a higher level directory. See Figure 3
